

# Practical Course Robotics

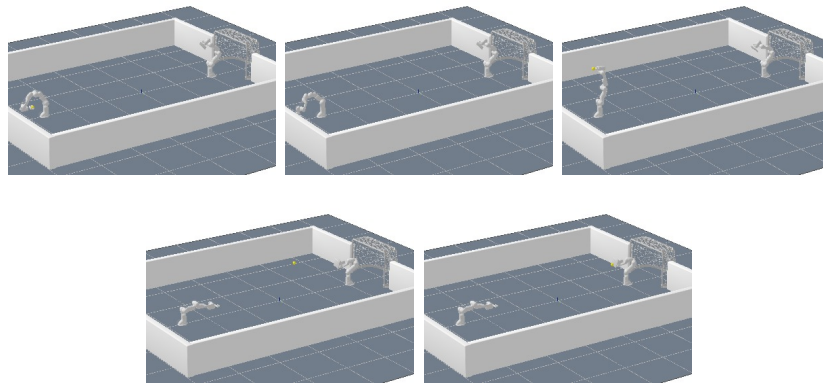

## Weekly Summary

Mohammed Muddasser, Raphael Broesamle

Calendar week 28

### Achievements this week

- Work Package 4 - Goalie: The objectives to move the goalie to the desired position after the throw have been integrated and synchronized in the environment.
- Work Package 5 - Integration and Extensive Testing: Integration of all work-packages complete. Synchronization between and throw and block is accomplished.

Simulation snapshots of various positions taken with time
